

Cloud Migration Strategies

Cloud services such as Microsoft Office 365 and Google Apps provide education organizations with low cost options for enterprise email and collaboration services. However migrating to these solutions is not a “no cost” or “now risk” effort. We help our clients plan and implement effective migration strategies that reduces risk and protects low total cost of ownership (TCO).

Moran Technology Consulting is a premier provider of management and technical consulting services to higher education. We are uniquely qualified to assist our clients with planning and implementing moves to cloud services based upon our experience:

- Performing requirements gathering, vendor selection and business case development for dozens of higher education clients;
- Leading *on-premise and cloud based email deployments and migrations* including Exchange, Live@edu, Google Apps, and Office 365;
- Providing unmatched *technical expertise in the areas of directory architecture and synchronization, account provisioning, and enterprise authentication;*
- Proven *collaborative approach* to strategic planning.
