

MORAN TECHNOLOGY CONSULTING

Information Technology Security

community

Moran Technology Consulting is a highly experienced and proven provider of consulting services to the education, public sector and financial services industries. We are intimately familiar with the growing IT security challenges facing higher education institutions.

The challenges are growing and becoming more complex every day. We offer a full range of IT security audit/assessment and remediation services to help our clients identify exposures, remediate weaknesses and reduce risk.

How do you know your network is secure?

Do you have clear policies that cover all centralized and decentralized machines?

Who is responsible for data security on ALL campus machines?

Where is all your FERPA and HIPPA regulated data stored?

Do you know if your systems have been breached?

How are security events identified, reported and responded to?
