MORAN
TECHNOLOGY CONSULTING

Project & Program Management Services

Moran Technology Consulting is a highly experienced and proven provider of consulting services to the higher education industry. We combine a detailed understanding of higher education processes, organization and culture, with heavy implementation experience and project management discipline to ensure successful ERP/SIS process transformation and system implementations.

Some common challenges that we have found at institutions implementing a new ERP system or a major upgrade:

- Complex project management experience is not available or in short supply.
- Coordinating activities across all functional areas is difficult.
- Department staff workload exceeds capacity during the project.
- Process analysis and design skills necessary for departments to define how they will process business with the new system are limited
- They are too close to the project to see the problems until it's too late

MTC provides experienced and vendor independent project management resources to manage all aspects of ERP/SIS implementation and process assistance to help your departments successfully make the change.

Program/Project Management Services

- Independent Program/Project Management
 - Project Planning and Scheduling
 - Issue Tracking and Resolution
 - Communications
