

## Security & Infrastructure Practice

Moran Technology Consulting is a premier provider of management and technical consulting services to higher education. We are uniquely qualified to provide our clients with IT security and infrastructure consulting services based upon our:

- Experience planning and leading IT infrastructure *projects for over 100 higher education clients*;
- A history of planning and managing *identity management, enterprise directory and on-premise and/cloud email and collaboration projects* in heterogeneous and complex IT environments;
- *Proven collaborative approach* to planning, designing and implementing infrastructure solutions in distributed IT environments;
- Record of implementing infrastructure solutions resulting in *highly successful projects* that significantly *reduce time, cost, and risk*.

We deliver a unique level of technical expertise. MTC lead architect, Brian Desmond, is a **Microsoft MVP** and author of O'Reilly's Active Directory, 4<sup>th</sup> Edition.
